Agenda Cloud Workshop

Agenda	Contenu
09h00 - 09h30	Accueil et Introduction
09h30 - 11h00	Présentation de la plateforme Azure pour les analyses de Machine Learning
11h00 - 12h30	Hands on Lab « Réalisation et déploiement de modèles prédictifs avec Azure ML Studio »
12h30 - 13h30	Déjeuner
13h30 - 15h00	Hands on lab « Réalisation et déploiement de modèles prédictifs avec le SDK Azure ML Service »
15h00 - 16h30	Hands On Lab « Réalisation et déploiement de modèles prédictifs avec Azure Databricks et Azure ML Services »
16h30 - 17h00	Questions & réponses, conclusion

Azure ML Studio

Welcome to Azure Machine Learning

Try it for free

Announcements **NEW!**

Azure Machine Learning Studio R Runtime Upgrade

Aired on October 31, 2018

The R language engine in the Execute R Script module of Azure Machine Learning Studio has added a new R runtime version -- Microsoft R Open (MRO) 3.4.4. MRO 3.4.4 is based on open-source CRAN R 3.4.4 and is therefore compatible with packages that works with that version of R.

Mining Campaign Funds

Aired on August 03, 2017

Play with 2016 Presidential Campaign finance data while learning how to prepare a large dataset for machine learning by processing and engineering features. This sample experiment works on a 2.5 GB dataset and will take about 20 minutes to run in its entirety.

Inside the Data Science VM

Aired on June 21, 2016

DSVM is a custom Azure Virtual Machine image that is published on the Azure marketplace and available on both Windows and Linux. It contains several popular data science and development tools both from Microsoft and from the open source community all pre-installed and pre-configured and ready to use. We will cover best practices that would show how you can use the DSVM effectively to run your next data science or analytics project.

Machine Learning

Quick Evaluation

Guest Workspace

8-hour trial

No sign-in required.

Enter

- No hassle instant access
- Stock sample datasets
- ML models built in minutes
- Full range of ML algorithms

Most Popular

Free Workspace

\$0/month

Don't already have a Microsoft account?
Simply [sign up here](#).

Sign In

- Free access that never expires
- 10 GB storage on us
- R and Python scripts support
- Predictive web services

Enterprise Grade

Standard Workspace

\$9.99/month

[Azure subscription](#) required
Other charges may apply. [Read more](#).

Create Workspace

- Full SLA Support
- Bring your own Azure storage
- Parallel graph execution
- Elastic Web Service endpoints

Azure ML Studio

The screenshot displays the Microsoft Azure Machine Learning Studio interface. The top navigation bar includes the title "Microsoft Azure Machine Learning Studio", the workspace name "AzureMLWorkspace", and user icons. The left sidebar contains a search bar and a list of experiment items: Saved Datasets, Trained Models, Transforms, Data Format Conversions, Data Input and Output, Data Transformation, Feature Selection, Machine Learning, OpenCV Library Modules, Python Language Modules, R Language Modules, Statistical Functions, Text Analytics, Time Series, Web Service, and Deprecated.

The main workspace is titled "TITANIC" and is in "draft" status. It shows a workflow diagram with the following steps: "train.csv" (dataset) → "Select Columns in Dataset" → "Split Data" → "Two-Class Decision Forest" (model) → "Train Model" → "Score Model" → "Evaluate Model". A "Mini Map" view is visible in the bottom left corner of the workspace, showing a smaller version of the workflow diagram.

The right sidebar contains the "Properties" and "Project" tabs. The "Properties" tab is active, showing "Experiment Properties" (START TIME, END TIME, STATUS CODE: InDraft, STATUS DETAILS: None) and a "Summary" section (Enter a few sentences describing your experiment (up to 140 characters)). The "Description" section (Enter the detailed description for your experiment.) is also visible.

The bottom toolbar includes icons for "NEW", "RUN HISTORY", "SAVE", "SAVE AS", "DISCARD CHANGES", "RUN", "SET UP WEB SERVICE", and "PUBLISH TO GALLERY".
